

**LESS TIME.
BETTER RESULTS.**

**Knox sports turf management with SurfCote® technology.
Fewer applications mean more time to do more on your to-do list.**

A TURF MANAGEMENT PROGRAM THAT HELPS MANAGE YOUR TIME.

With the Knox sports turf management program, you'll see better results with fewer applications. Using SurfCote® controlled-release technology, you achieve more uniform nutrient distribution, which means healthier turf year-round. One application in April and one in the late summer provide effective weed and pest prevention and reduced nutrient loss.

Sit back and let Knox do all the work.

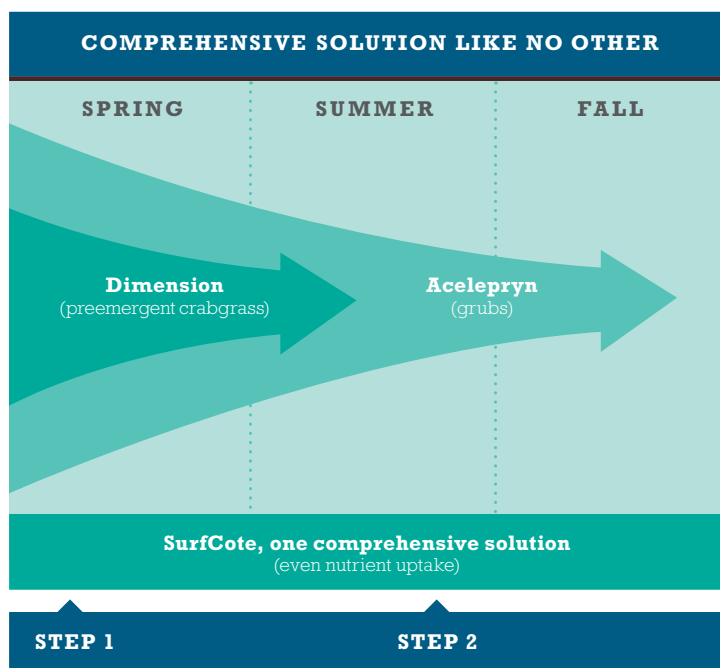

Our innovative coated products ensure that turf receives a consistent source of nitrogen from early applications on, keeping it healthy and green all season long.

Turf care made easier in two simple steps:

1 April application of Shaw's® Turf Food with Acelepryn® and Dimension®.
SKU #5328979

2 Late-summer application of Shaw's Premium Fertilizer with Gro-Gard®.
SKU #5588109

Spray with postemergent herbicides as needed to control broadleaf weeds.

Better for your turf. Better for the environment.

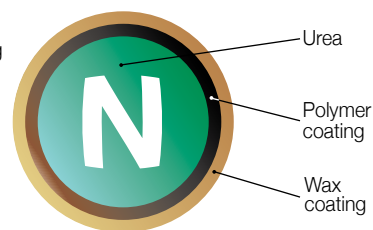

At Knox, we are committed to making sure our products are not only effective, but also environmentally responsible. This helps you meet local, state and federal regulations, but more importantly, it contributes to the health of the community. This means healthier turf that's actually better for the environment.

Our company. Our guarantee.

We have been in the specialty segment of the plant food business for over half a century. Our products have become recognized as leaders in consistent performance, quality and reliability. Today, we're ready to meet all current and future market and environmental requirements. We're ready to help you grow your best.

Knox Fertilizer leads the lawn-and-garden plant food industry with rigid specification standards and quality control. We check our products every step of the way, from incoming raw materials to in-process production to in-depth analytical release protocols. As a result, we guarantee that the products you buy will consistently deliver the performance you expect.

The patented polymer coating releases nitrogen in the same regular pattern that regulates turf demand for nitrogen.
