

Quality is our promise.

Shaw's Knox Fertilizer leads the turf industry with rigid specification standards and quality control. We check our products every step of the way, from incoming raw materials, in-process production, to in-depth analytical release protocols. As a result, we guarantee that the products you buy will consistently deliver the performance you expect.

SHAW'S TURF FERTILIZER WITH ACELEPRYN®

Shaw's is a registered trademark of Knox Fertilizer Company, Inc. Arena is a registered trademark of Sumitomo Chemical Takeda Agro Company Limited. Merit is a registered trademark of Bayer Crop Science. Meridian is a registered trademark of Syngenta Group Company. Acelepryn and Calteryx are trademarks or registered trademarks of DuPont ©2010 Knox Fertilizer Company, Inc.

Get maximum impact on pests, with minimal impact on the environment.

Nutrition plus protection equals healthier turf.

Shaw's Turf Fertilizer with Acelepryn® insect control helps you build rich green turf while providing reliable, consistent insect control. All in one early season application. Shaw's Turf Fertilizer delivers the balanced nutrition healthy turf needs, and Acelepryn is designed to control white grubs and other turf-damaging pests. Shaw's Turf Fertilizer with Acelepryn is ideal for use on landscape and recreational turf grass – including golf courses – as well as landscape ornamentals and even interior plantscapes.

One solution for multiple insect pests

Shaw's Turf Fertilizer with Acelepryn delivers broad spectrum control of turf-damaging white grub species, plus annual bluegrass weevil, billbugs, European crane fly, spittlebugs, turf caterpillars and chinch bugs. And you can apply it anytime throughout the growing season for long-lasting control whenever you need it.

Choose from two formulations.

Shaw's Turf Fertilizer with Acelepryn is available in two formulations. Choose 15-0-5, or 24-0-5, depending on your turf and conditions. Either one is ideal for an Integrated Pest Management (IPM) program.

Ask your Shaw's representative for complete information.

One early application provides season long control

	April	May	June	July	August
	Grubs, Residual Webworm, Annual Bluegrass Weevil, Billbugs	Residual Sod Weevil, Billbugs	Grubs, Residual Cutworm, Residual Sod Webworm	Residual Sod Webworm	Grubs
White Grub	x	x	x	x	x
Cutworm (Residual)	x	x	x	x	
Sod Webworm (Residual)	x	x	x	x	
Annual Bluegrass Weevil	x				
Billbugs	x				

Advanced new chemistry improves performance, reduces risk.

The fact is, no other grub control product stacks up to Acelepryn. It controls key surface feeding pests with an entirely unique class of chemistry and a new mode of action. Acelepryn's active ingredient is Calteryx™, a patented compound that interrupts an insect's muscle function, to paralyze and kill the pest. Acelepryn is tough on pests, but it has a low impact on non-target organisms: beneficial arthropods, as well as bees, birds, fish and mammals. The active ingredient is classified as EPA Reduced Risk for turf applications. Plus, Acelepryn controls white grubs at the lowest rates ever.

	Acelepryn	Merit	Meridian	Arena
White Grub control	Controls all five most common species*	x	x	x
	Controls all regionally important species**	x		
New class of chemistry	Resistance management tool	x		
	Novel mode of action	x		
Environmental profile	Reduced-risk insecticide	x		
	Extremely low mammalian toxicity	x		
	Extremely low fish and bird toxicity	x		
	Extremely low toxicity to bees	x		
	Extremely low toxicity to wildlife	x		
Applicator profile	Reduced REI of four hours	x	12 hours	12 hours
	Shirt, pants, shoes, socks only	x		
	No waterproof/chemical resistant gloves	x		x
	No protective eyewear	x	x	

* Most common five species: Japanese Beetle, Oriental Beetle, European Chafer, N&S Masked Chafer ** Asiatic Garden Beetle, Green June Beetle, Black Turf grass Atoenius, Aphodius spp., Phyllophaga spp.
