#### General Information

Shaw's™ 16-0-30 is a premium fertilizer designed for the turf professional who demands high quality turf. This product contains 100% of nitrogen from Polymer-Encapsulated Urea (SurfCote-4) and 100% of potash from Polymer-Encapsulated Sulfate of Potash (PCSOP). SurfCote-4 and PCSOP are a new controlled release technology that deliver a more uniform and predictable release of nutrients. The period for the release is up to 120 days for SurfCote-4 and 90 days for PCSOP. For Extended Release Technology, trust in SurfCote-4 and PCSOP to deliver the lasting performance you demand. This product also contains Gro-Gard, a proprietary blend of two bio-active amino acids and co-factors; it activates key amino acids that help regulate nutrient movement between plant cells. And with greater nutrient availability, plants can achieve their full genetic potential for growth and vigor. Gro-Gard protects your turf, optimizes nutrient uptake and movement within plants, and enhances overall plant health.

Regular use will help supply the needed nutrients for thick turf with excellent color while also improving resistance to disease, wear and environmental stress.

The following settings are approximate for applying contents of this package. Settings are based on average walking speed. Reduce settings for slower speed and increase for higher speed. Check your spreader on 250 sq. ft. and adjust to apply ¼ of 1,000 sq. ft. rate. **PLEASE NOTE:** These settings are furnished as a starting guide only.
