General Information

Shaw's™ 23-3-6 with TEAM[®] PRO 86, is a pre-emergence herbicide for control of annual grasses and broadleaf weeds in established turf grasses and established landscape ornamentals. This new TEAM[®] contains a 1 to 1 ratio of Benefin and Trifluralin for improved efficiency of common lawn annual grasses and weeds. This product contains 25% of the nitrogen from Polymer-Encapsulated urea (XRT). XRT is a new controlled release technology that delivers a more uniform and predictable release of nutrient for a period of up to 90 days. For Extended Release Technology, trust in XRT to deliver the lasting performance you demand.

The following settings are approximate for applying contents of this package. Settings are based on average walking speed. Reduce settings for slower speed and increase for higher speed.
