General Information

Shaw's® 14-0-0-17 Ca is a premium fertilizer designed for the specialty ag market. The product is 100% Polymer-Encapsulated Calcium Nitrate using SurfCote® Technology. SurfCote is a new controlled release technology that delivers a more uniform and predictable release of nutrient for a period of up to 180 days. In combination, these nutrients fuel prolonged growth. Plants and trees treated with SurfCote Calcium Nitrate are naturally healthier and less sensitive to stress during growth. In the build up to harvest, the SurfCote Calcium Nitrate will improve the size, strength and appearance of the fruit, tuber and leaf. Crops respond more quickly to nitrate. It is also more mobile in the soil and immediately available to the crop. By using SurfCote Calcium Nitrate, you will get longer lasting fruits and vegetables with improved inner health and outer beauty.
