General Information

Shaw's™ 30-0-10 is a premium fertilizer designed for the
turf professional who demands high quality turf. This
product contains 40% of the nitrogen from Polymer-
Encapsulated urea (XRT). XRT is a new controlled
release technology that delivers a more uniform and
predictable release of nutrient for a period of up to 90
days. For Extended Release Technology, trust in XRT to
deliver the lasting performance you demand. This
product also contains Gro-Gard, a proprietary blend of
two bio-active amino acids and co-factors; it activates
key amino acids that help regulate nutrient movement
between plant cells. And with greater nutrient
availability, plants can achieve their full genetic
potential for growth and vigor. Gro-Gard protects your
turf, optimizes nutrient uptake and movement within
plants, and enhances overall plant health.
